ANDREA TEMPESTINI

Solutions Engineer | Solutions Architect | Enterprise SaaS

tempestiniandrea@yahoo.it 07576461060 London, UK

https://www.linkedin.com/in/andrea-tempestini-1b293342/

PROFESSIONAL SUMMARY

Enterprise Solutions Engineer and Solutions Architect leading complex customer evaluations through structured discovery, solution design, and risk-based technical qualification. Multilingual EN, IT, FR, ES.

WORK EXPERIENCE

Solutions Engineer

Apr / 2025-Ongoing

ROLLER

London, UK

- Owned complex pre-sales cycles across EMEA and international markets for multi-site leisure, entertainment, payments, booking, and finance-linked operations.
- Aligned IT, Finance, Operations, Product, and commercial teams around feasible technical approaches for complex customer opportunities.
- Built integration and reporting plans across exports, mapping, reconciliation, and analytics instrumentation to prove operational fit.
- Scaled execution through reusable qualification frameworks, feasibility guidance, automation assets, and decision-ready documentation.

Solutions Architect

Nov / 2024-Apr / 2025

Simplestream

London, UK

- Designed end-to-end technical approaches for broadcasters and content owners, covering delivery, packaging, APIs, and rollout constraints.

Pre Sales Engineer

Oct / 2023-Oct / 2024

Endeavor Streaming

London, UK

- Supported sports-led opportunities through proposal responses applying cloud-native concepts to deployment planning.

Solutions Engineer

Jun / 2019-Oct / 2023

JWX

London, UK

- Supported publishers and digital media customers across analytics, monetisation, authentication, and custom video integrations.

Solutions Engineer

Sep / 2017-May / 2019

Equinix

London, UK

- Translated infrastructure requirements into feasible architectures spanning hybrid cloud, multicloud connectivity, integrations, and execution workshops for enterprise customers using major cloud ecosystems.

EDUCATION

MSc Biomechanical Engineering

Sep / 2006-Apr / 2011

University of Florence

Florence, Italy

- Built a foundation in systems thinking, analysis, and structured problem-solving, with strong exposure to modelling and complex systems.

TECHNICAL SKILLS

Enterprise solutioning, buyer alignment, technical qualification, value framing

10

Architecture and delivery: system design, NFRs, implementation planning, cybersecurity, risk controls

10

Integrations and identity: REST APIs, webhooks, OAuth, JWT, SSO, SAML, SCIM

10

Data and reporting: SQL, ETL, exports, reconciliation, Looker, CSV, SFTP, GL mapping, audit trail

10

Implementation, AI and tooling: Node, Python, JavaScript, React, scripting, workflow automation, AI orchestration logic, LLM integration concepts, RAG patterns, CLI, Git, Jira, Confluence, CI/CD, SDKs, Charles, browser dev tools

9

Cloud-native platforms: Terraform, CloudFormation, ARM, microservices, serverless, Kubernetes

8

COMMERCIAL EXECUTION

- Commercial motion: qualification, stakeholder mapping, business goals, demo strategy, PoC planning, RFP/RFI, security review, procurement/legal alignment, close plan, handoff
- Methods: MEDDICC, champion building, competitive positioning, value framing, ROI/KPI alignment, technical win strategy
- Scope: ACV £100k–£500k avg (~£250k), strategic deals up to ~$2.5M, multi-site groups 8–60 venues, ~3–4 wins/quarter, EMEA and international markets
